

TABLE OF CONTENTS

1.0 EXECUTIVE SUMMARY	1-1
1.1 OVERVIEW	1-1
1.2 INTRODUCTION	1-1
1.3 SYSTEMS EVALUATED	1-2
1.4 FTIHWG STRUCTURE	1-2
1.5 SCOPE AND ASSUMPTIONS	1-2
1.6 TECHNICAL EVALUATIONS	1-4
1.7 TECHNICAL LIMITATIONS	1-5
1.8 BENEFITS	1-5
1.9 HAZARDS	1-8
1.10 COST-BENEFIT ANALYSIS	1-9
1.11 OVERALL CONCLUSION	1-9
1.12 RECOMMENDATIONS	1-10
2.0 INTRODUCTION	2-1
2.1 BACKGROUND	2-1
2.1.1 Scope	2-1
2.1.2 Tasking Statement	2-1
2.1.3 Charter	2-4
2.2 WORKING GROUP DEVELOPMENT	2-4
2.2.1 Organization	2-4
2.2.2 Task Team Charters and Deliverables	2-5
2.2.3 Schedule	2-8
2.3 STANDARDS	2-9
2.3.1 Assumptions	2-9
2.3.2 Ground Rules	2-9
3.0 SERVICE HISTORY	3-1
3.1 METHODOLOGY	3-1
3.2 ANALYSIS	3-1
3.2.1 Analysis of Previous Tank Explosions	3-2
3.2.2 Postcrash Fuel Tank Fires	3-2
3.3 CONCLUSIONS	3-3
4.0 SAFETY ASSESSMENT	4-1
4.1 METHODOLOGY	4-1
4.2 FLAMMABILITY	4-1
4.2.1 Inerting	4-2
4.2.2 Flammability Exposure Analysis	4-2
4.2.3 GBI Analysis	4-4
4.2.4 OBGI Analysis	4-4
4.2.5 OBIGGS Analysis	4-4
4.3 FUNCTIONAL HAZARD ANALYSIS	4-5
4.4 PERSONNEL HAZARDS	4-5
4.4.1 General	4-5
4.4.2 Confined Spaces	4-5

4.4.3 Gaseous Nitrogen	4-6
4.4.4 Liquid Nitrogen	4-6
4.4.5 Gaseous Oxygen	4-7
4.5 SAFETY BENEFIT ANALYSIS	4-7
4.6 SAFETY ASSESSMENT SUMMARY AND CONCLUSIONS	4-10
5.0 GROUND-BASED INERTING	5-1
5.1 CONCEPT DESCRIPTION	5-1
5.1.1 Auxiliary Tanks	5-3
5.2 APPLICABILITY TO STUDY-CATEGORY AIRPLANES	5-5
5.3 AIRPORT RESOURCES SYSTEM REQUIRED	5-5
5.4 AIRPORT OPERATIONS AND MAINTENANCE IMPACT	5-5
5.4.1 Modification	5-5
5.4.2 Scheduled Maintenance	5-6
5.4.3 Unscheduled Maintenance	5-7
5.4.4 Flight Operations	5-8
5.4.5 Ground Operations	5-9
5.5 SAFETY ASSESSMENT	5-11
5.5.1 Flammability Exposure Analysis of GBI	5-11
5.5.2 Safety Assessment of GBI	5-13
5.6 COST-BENEFIT ANALYSIS	5-14
5.7 PROS AND CONS	5-19
5.8 TECHNICAL FEASIBILITY	5-19
5.8.1 New Designs	5-19
5.8.2 In-Production Airplane Designs	5-19
5.8.3 In-Service Airplane Retrofit	5-19
5.9 MAJOR ISSUES AND RESOLUTIONS	5-20
5.10 CONCLUSIONS	5-20
6.0 AIRPORT FACILITIES	6-1
6.1 CONCEPT DESCRIPTION	6-1
6.1.1 Ullage Washing	6-1
6.1.2 Fuel Scrubbing	6-4
6.1.3 Fuel Cooling	6-8
6.1.4 Carbon Dioxide Fuel Saturation	6-8
6.2 AIRPORT FACILITIES	6-9
6.2.1 Methodology	6-9
6.2.2 Airport Evaluations	6-9
6.3 IMPACT ON AIRPORTS	6-10
6.4 ENVIRONMENTAL EVALUATION	6-10
6.5 COST-BENEFIT ANALYSIS	6-11
6.6 TECHNICAL LIMITATIONS	6-15
6.7 POTENTIAL IMPACT ON FUEL PERFORMANCE	6-15
7.0 ONBOARD GROUND INERTING	7-1
7.1 SYSTEM REQUIREMENTS	7-1
7.2 CONCEPT DESCRIPTION	7-1
7.2.1 Air Source	7-2
7.2.2 Pressure Ratio: Match APU Pressure	7-2
7.2.3 Air Separator	7-2
7.2.4 Time for Inerting	7-3
7.2.5 Flammability Exposure	7-3

7.3 APPLICABILITY OF CONCEPT TO STUDY-CATEGORY AIRPLANES	7-3
7.4 AIRPORT RESOURCES REQUIRED	7-3
7.5 AIRLINE OPERATIONS AND MAINTENANCE IMPACT	7-4
7.5.1 Modification	7-4
7.5.2 Scheduled Maintenance.....	7-5
7.5.3 Unscheduled Maintenance	7-5
7.5.4 Flight Operations	7-10
7.5.5 Ground Operations	7-10
7.6 SAFETY ASSESSMENT	7-11
7.7 COST-BENEFIT ANALYSIS	7-12
7.8 PROS AND CONS	7-17
7.9 MAJOR ISSUES AND RESOLUTIONS	7-17
7.9.1 System Size.....	7-17
7.9.2 Air Separator Modules	7-18
7.9.3 Static Electricity	7-18
7.10 CONCLUSIONS	7-18
8.0 ONBOARD INERT GAS GENERATING	8-1
8.1 SYSTEM REQUIREMENTS	8-1
8.2 SYSTEM CONCEPT DESCRIPTION	8-1
8.2.1 Air Source.....	8-2
8.2.2 Pressure Ratio	8-3
8.2.3 Air Separator	8-3
8.2.4 Descent Rate	8-3
8.2.5 Flammability Exposure	8-3
8.3 APPLICABILITY OF CONCEPT TO STUDY-CATEGORY AIRPLANES	8-3
8.4 AIRPORT RESOURCES REQUIRED	8-3
8.5 AIRLINE OPERATIONS AND MAINTENANCE IMPACT	8-4
8.5.1 Modification	8-4
8.5.2 Scheduled Maintenance.....	8-4
8.5.3 Unscheduled Maintenance	8-5
8.5.4 Flight Operations	8-14
8.5.5 Ground Operations	8-15
8.6 SAFETY ASSESSMENT	8-15
8.7 COST-BENEFIT ANALYSIS	8-16
8.8 PROS AND CONS	8-20
8.9 MAJOR ISSUES AND RESOLUTIONS	8-21
8.9.1 System Size.....	8-21
8.9.2 Air Separator Modules	8-22
8.9.3 Static Electricity	8-22
8.10 CONCLUSIONS	8-22
9.0 HYBRID INERT GAS GENERATING SYSTEM	9-1
9.1 SYSTEM REQUIREMENTS	9-1
9.2 CONCEPT DESCRIPTION.....	9-1
9.3 APPLICABILITY OF CONCEPT TO STUDY-CATEGORY AIRPLANES	9-1
9.4 AIRPORT RESOURCES REQUIRED	9-2
9.5 AIRLINE OPERATIONS AND MAINTENANCE IMPACT	9-2
9.6 SAFETY ASSESSMENT	9-2
9.7 COST-BENEFIT ANALYSIS	9-6
9.8 PROS AND CONS OF SYSTEM DESIGN CONCEPT	9-19

9.9 MAJOR ISSUES AND RESOLUTIONS ASSOCIATED WITH CONCEPT	9-20
9.10 CONCLUSIONS	9-21
10.0 AIRPLANE OPERATIONS AND MAINTENANCE	10-1
10.1 METHODOLOGY	10-1
10.1.1 Modification	10-3
10.1.2 MEL Relief	10-5
10.1.3 Scheduled Maintenance	10-7
10.1.4 Unscheduled Maintenance	10-9
10.1.5 Flight Operations	10-10
10.1.6 Ground Operations	10-11
10.2 MAINTENANCE IMPACTS	10-12
10.2.1 Modification and Retrofit	10-12
10.2.2 MEL Relief	10-12
10.2.3 Scheduled Maintenance	10-12
10.2.4 Unscheduled Maintenance	10-13
10.2.5 Maintenance Training	10-14
10.3 OPERATIONAL IMPACT	10-14
10.3.1 Flight Operations	10-14
10.3.1.1 Schedule Impact	10-14
10.3.1.2 MEL Relief	10-15
10.3.1.3 Lost Revenue	10-15
10.3.1.4 Flight Operations Safety	10-15
10.3.1.5 Flight Operations Training	10-16
10.3.2 Ground Operations	10-16
10.3.2.1 Ground Operations Safety	10-16
10.3.2.2 Ground Operations Training	10-16
10.3.2.3 Ground Servicing	10-17
11.0 ESTIMATING AND FORECASTING	11-1
11.1 METHODOLOGY	11-1
11.2 ECONOMIC MODEL FACTORS	11-2
11.3 STUDY PERIOD	11-4
11.4 IMPLEMENTATION	11-4
11.5 COST SUMMARIES	11-5
12.0 REGULATORY IMPACT	12-1
12.1 TYPE CERTIFICATION	12-1
12.2 MAINTENANCE AND AIRPLANE OPERATIONS	12-3
12.3 AIRPORT FACILITIES	12-6
12.4 ENVIRONMENTAL	12-6
12.5 REGULATORY TEXT AND GUIDANCE MATERIAL	12-6
12.5.1 Methodology	12-7
12.5.2 Regulatory Text	12-8
12.5.3 Intent of Proposed Guidance Material	12-10
12.5.4 Guidance Material	12-13
13.0 CONCLUSIONS AND RECOMMENDATIONS	13-1
13.1 OVERALL CONCLUSIONS	13-1
13.2 RECOMMENDATIONS	13-3

LIST OF FIGURES

1-1.	Technical Summary of Inerting System Concepts	1-4
1-2.	Flammability Exposure—Generic In-Service and Current Production Airplanes	1-6
1-3.	Worldwide Forecast Cumulative Accidents	1-7
1-4.	Estimated Cumulative Worldwide Avoided Accidents, 2005 Through 2020	1-8
1-5.	Cost-Benefit Analysis Results, Worldwide Fleet, 2005 Through 2020, Based on Present Value in Year 2005 \$US	1-9
4-1.	Generic Tank Thermal Characteristics	4-3
4-2.	Personnel Hazards	4-6
4-3.	Worldwide Unexplained Fuel Tank Explosion Accident History and Forecast	4-8
4-4.	Average Number of People on Board Each Generic Airplane	4-9
4-5.	Worldwide Accidents Avoided by GBI and OBIGGS	4-9
4-6.	Summary of Lives Affected Worldwide by Inerting	4-10
4-7.	Accident Forecast Summary Information	4-11
4-8.	Fuel Tank Explosion Accident Rate Comparison	4-11
5-1.	Center Tank Installation Concept	5-2
5-2.	Center and Auxiliary Tank Installation Concept	5-4
5-3.	Modification Estimates for Ground-Based Inerting Systems	5-6
5-4.	GBI Additional Scheduled Maintenance Hours	5-7
5-5.	GBIS Reliability and Maintainability Analysis	5-8
5-6.	GBI System Cost to Carry	5-8
5-7.	Annual Labor Estimate for Ullage Washing	5-10
5-8.	Flammability Exposure Results, Ground-Based Inerting System	5-12
5-9.	U.S. Cumulative Accidents With Ground-Based Inerting	5-13
5-10.	Worldwide Cumulative Accidents With Ground-Based Inerting	5-14
5-11.	Scenario 11—Ground-Based Inerting, HCWT Only, All Transports (World)	5-15
5-12.	Scenario 12—Ground-Based Inerting, All Fuselage Tanks, All Transports (World)	5-15
5-13.	Scenario 11—Ground-Based Inerting, HCWT Only, All Transports (U.S.)	5-16
5-14.	Scenario 12—Ground-Based Inerting, All Fuselage Tanks, All Transports (U.S.)	5-16
5-15.	Scenario 11—Ground-Based Inerting, HCWT Only, All Transports (World, Passenger Only) ..	5-17
5-16.	Scenario 12—Ground-Based Inerting, All Fuselage Tanks, All Transports (World, Passenger Only)	5-17
5-17.	Scenario 11—Ground-Based Inerting, HCWT Only, All Transports (U.S., Passenger Only) ...	5-18
5-18.	Scenario 12—Ground-Based Inerting, All Fuselage Tanks, All Transports (U.S., Passenger Only)	5-18
6-1.	Membrane Gas Generator at Concourse for Ullage Washing	6-2
6-2.	Typical Metering Station, Nitrogen Flow, and Pressure Control	6-2
6-3.	Current Tank Farm Configuration	6-6
6-4.	Fuel-Farm Piping With Added Fuel Scrubbing Unit	6-6
6-5.	Complete Fuel Scrubbing Operation	6-7
6-6.	Airport Facility Survey Form for FAA Fuel Tank Inerting	6-10
6-7.	ARAC Facility Estimate—Fixed Ullage System	6-12
6-8.	ARAC Facility Estimate—Mobile Ullage System	6-12
6-9.	ARAC Facility Estimate—Fixed Scrubber System	6-13
6-10.	ARAC Facility Estimate—Mobile Scrubber System	6-13
7-1.	OBGIS Schematic	7-2
7-2.	Modification Estimates for the OBGIS	7-4

7-3.	OBGI Additional Scheduled Maintenance Hours	7-5
7-4.	OBGIS Annual Use Rate	7-5
7-5.	Predicted OBGIS Annual Failure Rate	7-6
7-6.	Annual Unscheduled Maintenance Labor Estimate per Airplane	7-7
7-7.	OBGIS Availability	7-8
7-8.	MEL Dispatch Relief Effect	7-9
7-9.	Annual OBGIS Flight Delay Hours	7-10
7-10.	U.S. Cumulative Accidents With Onboard Ground Inerting	7-11
7-11.	Worldwide Cumulative Accidents With Onboard Ground Inerting	7-12
7-12.	Scenario 1—Onboard Ground Inerting, HCWT Only, Large, Medium, Small Transports, PSA/Membrane Systems (World)	7-13
7-13.	Scenario 2—Onboard Ground Inerting, All Fuselage Tanks, Large, Medium, Small Transports, PSA/Membrane Systems (World)	7-13
7-14.	Scenario 1—Onboard Ground Inerting, HCWT Only, Large, Medium, Small Transports, PSA/Membrane Systems (U.S.)	7-14
7-15.	Scenario 2—Onboard Ground Inerting, All Fuselage Tanks, Large, Medium, Small Transports, PSA/Membrane Systems (U.S.)	7-14
7-16.	Scenario 1—Onboard Ground Inerting, HCWT Only, Large, Medium, Small Transports, PSA/Membrane Systems (World, Passenger Only)	7-15
7-17.	Scenario 2—Onboard Ground Inerting, All Fuselage Tanks, Large, Medium, Small Transports, PSA/Membrane Systems (World, Passenger Only)	7-15
7-18.	Scenario 1—Onboard Ground Inerting, HCWT Only, Large, Medium, Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	7-16
7-19.	Scenario 2—Onboard Ground Inerting, All Fuselage Tanks, Large, Medium, Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	7-16
7-20.	OBGI Required Resources for All Tanks	7-18
8-1.	OBIGGS Schematic	8-2
8-2.	Modification Estimations for OBIGGS	8-4
8-3.	OBIGGS Additional Scheduled Maintenance Times—Cryogenic System	8-5
8-4.	OBIGGS Additional Scheduled Maintenance Times—Membrane System	8-5
8-5.	System Annual Utilization Rate	8-6
8-6.	System MTBUR	8-7
8-7.	System Annual Failure Rate	8-8
8-8.	Additional Annual Labor-Hours	8-9
8-9.	Additional Annual Labor Costs	8-10
8-10.	System Availability (10 Days' MMEL Relief)	8-11
8-11.	Delays per Year (Hours)	8-12
8-12.	OBIGGS Power Requirements (kVA)	8-13
8-13.	U.S. Cumulative Accidents With OBIGGS	8-15
8-14.	Worldwide Cumulative Accidents With OBIGGS	8-16
8-15.	Scenario 5—OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (World)	8-17
8-16.	Scenario 13—OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (World)	8-17
8-17.	Scenario 5—OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (U.S.)	8-18
8-18.	Scenario 13—OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (U.S.)	8-18

8-19.	Scenario 5—OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	8-19
8-20.	Scenario 5—OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	8-19
8-21.	Scenario 13—OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	8-20
8-22.	OBIGGS System Size Issues	8-21
9-1.	U.S. Cumulative Accidents With Hybrid OBIGGS	9-3
9-2.	Worldwide Cumulative Accidents With Hybrid OBIGGS	9-4
9-3.	U.S. Forecast Cumulative Accidents With Hybrid OBGIS	9-5
9-4.	World Forecast Cumulative Accidents With Hybrid OBGIS	9-6
9-5.	Scenario 3—Hybrid OBGI, Heated CWT Only, Large, Medium, Small Transports, PSA/Membrane Systems (World)	9-7
9-6.	Scenario 4—Hybrid OBGI, All Fuselage Tanks, Large, Medium, Small Transports, PSA/Membrane Systems (World)	9-7
9-7.	Scenario 7—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (World)	9-8
9-8.	Scenario 9—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (World)	9-8
9-9.	Scenario 14—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (World)	9-9
9-10.	Scenario 15—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (World)	9-9
9-11.	Scenario 3—Hybrid OBGI, Heated CWT Only, Large, Medium, and Small Transports, PSA/Membrane Systems (U.S.)	9-10
9-12.	Scenario 4—Hybrid OBGI, All Fuselage Tanks, Large, Medium, and Small Transports, PSA/Membrane Systems (U.S.)	9-10
9-13.	Scenario 7—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (U.S.)	9-11
9-14.	Scenario 9—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (U.S.)	9-11
9-15.	Scenario 14—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (U.S.)	9-12
9-16.	Scenario 15—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (U.S.)	9-12
9-17.	Scenario 3—Hybrid OBGI, Heated CWT Only, Large, Medium, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-13
9-18.	Scenario 4—Hybrid OBGI, All Fuselage Tanks, Large, Medium, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-13
9-19.	Scenario 7—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-14
9-20.	Scenario 9—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-14
9-21.	Scenario 13—OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-15
9-22.	Scenario 14—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-15
9-23.	Scenario 15—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (World, Passenger Only)	9-16

9-24.	Scenario 3—Hybrid OBGI, Heated CWT Only, Large, Medium, Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	9-16
9-25.	Scenario 4—Hybrid OBGI, All Fuselage Tanks, Large, Medium, Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	9-17
9-26.	Scenario 7—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	9-17
9-27.	Scenario 9—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Membrane Systems, and Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	9-18
9-28.	Scenario 14—Hybrid OBIGGS, Heated CWT Only, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	9-18
9-29.	Scenario 15—Hybrid OBIGGS, All Tanks, Large and Medium Transports, Cryogenic Systems, and Small Transports, PSA/Membrane Systems (U.S., Passenger Only)	9-19
9-30.	Hybrid OBGIS Installation Issues	9-20
9-31.	Hybrid OBIGGS Installation Issues	9-21
10-1.	Flight Delay Assumptions	10-7
10-2.	Average Fleetwide Maintenance Intervals	10-8
10-3.	Airplane Use by Category	10-10
11-1.	Inerting Combinations Evaluated	11-1
11-2.	Cost Summary—Worldwide Fleet, All Transports	11-5
11-3.	Cost Summary—U.S. Fleet, All Transports	11-5
11-4.	Cost Summary—Worldwide Fleet, Passenger Planes Only	11-6
11-5.	Cost Summary—U.S. Fleet, Passenger Planes Only	11-6

GLOSSARY

AC	advisory circular
AD	Airworthiness Directive
AEA	Association of European Airlines
AECMA	European Association of Aerospace Industries
AIA	Aerospace Industries Association
ALPA	Airline Pilots Association
API	American Petroleum Institute
APU	auxiliary power unit
ARAC	Aviation Rulemaking Advisory Committee
ASM	air separator module
ASTM D	an ASTM test designation
ASTM	American Society for Testing and Materials
ATA	Air Transport Association of America
ATB	air turnback
BITE	built-in test equipment
CBT	computer-based training
CFR	Code of Federal Regulations
CMR	certification maintenance requirement
CRC	Coordinating Research Council
CWT	center wing tank
DDG	dispatch deviation guide
DOT	Department of Transportation
EPA	Environmental Protection Agency
ER	extended range
ERA-7	an additive for CO ₂ -enriched fuel
ETOPS	extended twin operations
FAR	Federal Aviation Regulation
FHA	functional hazard analysis
FTHWG	Fuel Tank Harmonization Working Group
FTIHWG	Fuel Tank Inerting Harmonization Working Group
GBI	ground-based inerting
GBIS	ground-based inerting system
GN ₂	gaseous nitrogen
GPM	gallons per minute
HCWT	heated center wing tank
HWG	Harmonization Working Group
IAMAW	International Association of Machinist Aerospace Workers
IATA	International Air Transport Association
JAA	Joint Airworthiness Authorities
JAR	Joint Aviation Requirements

LFL	lower flammability limit
MEL	minimum equipment list
MMEL	master minimum equipment list
MO	modification order
MSG-3	Maintenance Steering Group—Version 3
MTBF	mean time between failures
MTBMA	mean time between maintenance actions
MTBUR	mean time between unscheduled removal
NEA	nitrogen-enriched air
NIOSH	National Institute of Occupational Safety and Health
NPRM	Notice of Proposed Rulemaking
NSF	nitrogen-saturated fuel
NTSB	National Transportation Safety Board
OBGI	onboard ground inerting
OBGIS	onboard ground inerting system
OBI	onboard inerting
OBIGGS	onboard inert gas generating system
OEM	original equipment manufacturer
OSHA	Occupational Safety and Health Administration
p/m	parts per million
PRV	pressure-regulating valve
PSA	pressure-swing adsorption
SB	service bulletin
SCF	standard cubic feet
SCFM	standard cubic feet per minute
SFAR	Special Federal Aviation Regulation
TC	type certificate
TCAS	traffic collision avoidance system
UFL	upper flammability limit
VOC	volatile organic compound
